(54) METHOD AND DEVICE FOR RECORDING OPTICAL DISK

(57)Abstract:

PROBLEM TO BE SOLVED: To enable writing with high quality and small in reproducing error.

SOLUTION: When a test recording mode is specified by an operation mode specification means 48, a recording/reproducing means 22 performs test recording by respectively changing write-in power, erase power and bottom power. The means 22 reproduces the test recording after the test recording, and obtains respective optimum values of the write-in power, the erase power and the bottom power that an asymmetric value becomes an optimum value, or a modulation factor becomes optimum or an error rate becomes the lowermost. Actual recording is performed using the combination of these optimum values.

LEGAL STATUS

[Date of request for examination] 20.11.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3259642

[Date of registration] 14.12.2001

[Number of appeal against examiner's decision of rejection]
